

POWERPRINT

TRANSPARENT CRACKLES

IT IS POSSIBLE TO OBTAIN A NICE VINTAGE LOOKING
SEMI-GLOSSY TRANSPARENT CRAQUELÉ EFFECT
WITH POWERPRINT

POUR A LAYER OF POWERPRINT OF ABOUT 2 TO 3 MM
THICKNESS ONTO A COLORED OR EVEN NOT COLORED SURFACE
FROM A DISTANCE GENTLY SPRAY SOME WATER ONTO THE
STILL WET POWERPRINT LAYER USING A SPRAY BOTTLE
WITH SOFT SPRAY VAPORISATION, THEN CAREFULLY DRY THE
LAYER FROM A DISTANCE WITH HAIR DRYER
ON LOWEST BLOW, BUT WARMEST TEMPERATURE

THIS TECHNIQUE GIVES NICE RESULTS ONTO e.g. ✓
VINTAGE SEPIA PICTURES, SHABBY CHIC CREATIONS, ...

MAKE SURE THOUGH YOU HAVE NOT USED ANY BISTER OR BRUSH ON
ON YOUR ARTWORK IN THE UNDERLAYING LAYERS,
SINCE THEY MIGHT GO BLEEDING/COLOR THE POWERPRINT LAYER !
