

EASY STRUCTURE

SOFT WHITE PAPERS

Tear small pieces of soft white paper
and add them little by little
to the structure paste
while mixing the materials with a spatula.

Make sure that the pieces of paper
are steadily but completely soaked with the paste.

The easy structure will now have a different texture
with which you can apply
a nice extra structure to your artwork.

Use WHITE papers such as:
soft toilet paper - kitchen paper towel
tissues - napkin papers

You can also of course also add already pulvered paper
instead, actually powertex stone art
