FISH DUO

- Use a marker to draw the position of the mouth and the eyes, then cut out the part of the mouth, use a knife on both sides to make a cavity the size of the eyes and stick the marbles with a little Powertex
- Then make with a firm bendable (electricity) wire upper, side, and tail fins, play with the length of the wires to create a nice vane
- Insert the wires for each fin in the hull and make a firm basic shape with paper tape
- The tail is reinforced with aluminum foil
- Tail length man: + - 25 cm / Female 18

FISH DUO

TUTORIAL - FISH DUO

- Put on plastic gloves
- Pour Powertex into a plastic container and coat the fish with a sponge
- Fully cover the fish with pieces of silk paper or thin cotton cloth, stick them on the still damp surface, work from the tail to the head in a tile-like manner, while making some grain structures in the paper /

- After drying, fully coat the fish with Powertex again and leave to dry for 24 hours
- Spatula a thin layer of structure paste on the

- Then carefully scrape off the structure paste excess as much as possible
- The dark grain structures are now clearly visible again
- Allow 24 hours to dry

FISH DUO

TUTORIAL - FISH DUO

- Then we use pigments to color the fish.
- Play with Powercolor and Colortricx pigments which are mixed with a little Easy Varnish to paint
- Use different color mixtures, tamponer or brush carefully with almost dry sponge / brush of choice
- Different color gradations with Powercolor Gray mixed with Titanium white were used first, then glance effects were applied with Colortricx Terragreen and Terraviolet BUT careful moderate dosing!
